

Peace of Mind! In today's climate of prosecution it's Priceless.

We have worked closely with many clients to achieve a genuine improvement in business efficiency by the control and reduction of avoidable costs. Some of them are quoted here. In these environmentally conscious times it is important to recognise the reduction in carbon footprint that these companies are already achieving.

The DfT estimate that in the UK we use 10 billion litres of fuel moving 2001 billion tonnes of goods which produces 26 billion Kg of Carbon. We can all do our bit to reduce this CO2 emission.

Our clients have improved driver retention and employee engagement through improved leadership at all levels, developing their driver workforce into a more effective team for success. Let Road Skills OPCOM give you Peace of Mind and a more profitable return for your money.

David Somers
Managing Director
Road Skills Ltd

Setting the Standard

OPCOM

Operator's Compliance System

What if your trucks made more Profit with lower risks...

Setting the Standard

Delivering Legal, Safe, Economic Vehicle Operation

The Operator's Compliance System

- it doesn't sound very exciting, but this is a management tool that will help you to:

1 Reduce the risk of Corporate Manslaughter prosecution

2 Prevent collisions

3 Reduce Insurance Claims

4 Save money

5 Help you increase the profits of your business

6 Reduce the Carbon Footprint of your trucks

How do we do it?

What we've done is go back to basics and asked:

- 1 What are the most common types of injuries and collisions?
- 2 How can they be prevented?

Road Skills OPCOM offers a powerful Collision and Injury Prevention programme together with a focus on effective Cost Saving Action plans that are easily used within your business.

So what's in the toolkit?

We've broken OPCOM into four components:

- 1 Good Practice Reviews:
- 2 Straightforward Tool Box Talks and Walk Round Training for drivers
- 3 Effective Supervisory Checks that can be completed in just a few minutes
- 4 Driving Techniques that encourage economic driving

From smaller Operators to Blue-Chip companies all our clients use the OPCOM system and the 6-monthly Risk Advisor visits to keep their plans on track

We are firm believers in the structured approach offered by the likes of ISO 9001 and 14001.

Road Skills OPCOM sits very comfortably alongside these standards and allows us to focus more closely than ever before on our 'O' licence undertakings.

Our accident rate has reduced substantially since we introduced OPCOM. We've got much better at spotting problems and dealing with them before they become serious.

Our drivers enjoy the training they receive and actually respond in a very positive way towards the measures we've introduced as a result of OPCOM. This is borne out by the marked improvement we've experienced with driver retention. Given our experience with Road Skills OPCOM, we would have no hesitation in recommending it to other operators."

Mark Gilfedder, Business Compliance Manager, **Maxi Haulage Ltd**

"The key element of OPCOM is that it has helped to establish important systems and procedures within our business. We have become more active in reducing our exposure to risk. Building on this has allowed us to address business issues such as improving MPG.

OPCOM has provided us with the complete package to enable us to reduce risk, remain legally compliant and help increase efficiency."

Simon Chamberlain,
Managing Director
Chamberlain Transport Ltd.

"Environmental initiatives are at the heart of innovation at Howard Tenens. Road Skills 'OPCOM' system assists us in this through its focus on fuel efficiency and reduction of vehicle collisions enabling us to deliver a measurable reduction to our carbon footprint."

Ben Morris,
Sales & Marketing Director
Howard Tenens

"The OPCOM service allows us to deliver straightforward and common sense training which improves our drivers' awareness, productivity and self-esteem, and at the same time ensures we fully comply with the requirements of Operators Licensing."

Ian Miller,
Managing Director
Frederick R Miller Ltd.
